# Endura® **COWGRAIN** Split-leather Gloves

## FUNCTIONAL BENEFITS:

Grain cowhide offers superb abrasion protection

Gunn-cut styling and double stitching for added durability; strapped thumb for rugged durability and split-leather cowhide gauntlet cuffs for extra wrist protection

Three styles: regular; heat/flame-resistant; or, out-seam sewn version for reduced rubbing and chafing

## APPLICATIONS:

Steel & Iron Industry  
Material handling  
Mining

## Endura® Cowgrain Split-leather Gloves

This style of Endura® glove is made from smooth cowgrain leather for dexterity and some oil and water resistance. This is a heavier leather compared to other types, providing increased durability and abrasion resistance.

Here we offer three styles, all with 4.5" split-leather cuffs and seams that are positioned toward the back of fingers for reduced rubbing and annoyance on top of longer seam life.

First is a regular version, all-leather with strapped thumbs and double-sewn forefinger. Next is a heat-resistant version of the same glove featuring 4 mm. foam lining for good thermal protection and a flame-retardant jersey liner. Glove is fully Kevlar® sewn.

The last style is also like the first, but is out-seam sewn for reduced rubbing and chafing and all-day comfort while working. Fully Kevlar® sewn.
